SYNOPSIS

Love comes in many different forms, it is often unexpected, fleeting and sometimes life changing. Levithan’s collection of short stories has evolved over many years, beginning as a series of Valentine ‘gifts’ to his friends. Romantic, confronting, sentimental and humorous, the stories draw together characters from different backgrounds to explore one common theme – love. From the first date (in some cases set up by parents, or young couples who fall together out of necessity or expectation) to the longer-term couple who know each other from years of love, but still remember their youth, many of the stories present an open, raw perspective of same-sex relationships.

While love may be the common thread through the collection, it becomes clear that it is human interaction that creates the most interesting aspect of these stories. Whether read from cover to cover, or dipping in and out, each story is compact and clever.

Not all of the stories have happy endings, but they expose the raw emotion of relationships, the uncertainty of love and the way that it can change who you are.
